② Via Learning Function for TV

The code learning function allows this remote control to learn and store the button commands from an original remote control to buttons under TV Mode.

1. Position your original TV remote pointing towards the IR LED on front of the MYA remote control. Keep the distance apart to about 25mm.

2. Press and hold both the MYA **TV POWER** and **MUTE** buttons for approx. 3sec until LED indicator is continuously on.

3. Enter the 4-Digit Code 8>7>0>0. The LED indicator blinks off for each button press.

4. Press and release the button of MYA Universal Remote Control corresponding to the buttons of the TV remote control to learn. Learning buttons are **TV POWER**, **MUTE**, **VOL+** and / **VOL -**

5. Press and hold TV remote button until the MYA LED indicator blinks off (wait for 2 or 3 seconds to complete). If there is a problem with the learning procedure, the LED indicator will flash for three seconds but will remain in the learning setup; please repeat from step 5 in this case.

6. Repeat steps 4 and 5 for other remote buttons to be learned and stored.

7. When all desired TV remote commands are learned, press and release the **EXIT** button. The LED turns off.

Note: VOL+, VOL- and MUTE must still be enabled for TV using the "Volume Lock to TV Mode" feature.

MYA-4MOD1422 Volume Lock to TV Mode

By default, the volume and mute buttons control the STB. To modify and use for TV, refer to the procedure below:

1. Press and hold the **TV OR STB POWER** and **MUTE** keys for approx. 3 sec or until a LED indicator blinks off then remains continuously on.

2. Release the TV or STB Power and Mute buttons. A power LED indicator will remain on.

3. Enter 4 digit code 8 > 1 > 0 > 0

❸ Via Direct Code Entry

When operating the remote control, point it at the TV device being controlled.

1. Make sure your **TV device is switched on** (not in standby).

2. Press and hold the **TV POWER** and **MUTE** keys until LED indicator blinks off and TV POWER indicator remains continuously on.

3. Press and release the **FAV** button. TV Power LED indictor blinks off then remains on.

4. Enter the 4-digit code corresponding to the brand of your TV device, refer to the **TV Codes List**. The TV Power LED indicator blinks off each time a button is pressed.

5. When code is entered correctly, The TV Power LED turns-off after the last digit has been entered.

If the RCU, does not respond as expected, repeat the programming by using other codes.

1. Press and hold the **TV OR STB POWER** and **MUTE** keys for approx. 3 sec or until a LED indicator blinks off then remains continuously on.

2. Release the TV or STB Power and Mute buttons

3. Enter 4 digit code 8 > 8 > 9 > 9

Simple Set Procedure for Set Top Box

1. Press and hold the **STB POWER** and **MUTE** keys until a LED indicator blinks off then STB POWER indicator remains continuously on.

2. Enter the **4-digit code** corresponding to the **STB device** (from the code list). The LED indicator blinks off each time you press a button.

3. If the code is entered correctly, the STB Power LED indicator turns off after the last digit has been entered.

4. If an invalid code is entered, the LED indicator will flash for three seconds before turning off. Recheck the selected Mode and Code and repeat the programming from Step 1.
